

Patent Application No. 10/755,716
Art. Unit: 2617
Remarks/Arguments
Dated November 3, 2009
Reply to Office Action of October 14, 2009.

Page 9

REMARKS/ARGUMENTS

In the non-final Action dated October 14, 2009, the Examiner rejected claims 7, 10, and 11 under 35 U.S.C. 112, 2nd paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter.

Pursuant to the above-noted Office Action, claims 7, 10, and 11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The applicants acknowledge and appreciate the indicated allowable subject matter.

The applicants have rewritten and amended the claims 7, 10 and 11. The amended claims 7, 10 and 11 as now presented are believed to be in the allowable condition.

The applicants agree to change the title of the invention. Please amend the title of the invention and rewrite it as follows:

"A method for transmitting and receiving data with low BER in presence of interference between subscriber stations".

Respectfully submitted,

Dated November 3, 2009.

Razmik Hakobyan.
